How do you know the mix is going to work?

Standard Application

Here is an example of a standard application, with ideal top soil and soil testing:

INGREDIENTS	STANDARD APPLICATION
CELLULOSE FIBRE	✓
POLYMER BINDER	✓
SEED	✓
ORGANIC FERTILISER	✓
WILL IT WORK?	✓

Only when you have ideal topsoil and complete soil testing, will your standard application work. Otherwise it is likely to fail as it won't contain the extra ingredients necessary to fix the soil microbiology. Visit our [website](#) for more information or [contact](#) one of our friendly team and they will happily guide you to the right solution for your site.

Compost Blanket

And here we have an example of a compost blanket but with no topsoil:

INGREDIENTS	COMPOST BLANKET
CELLULOSE FIBRE	✓
POLYMER BINDER	✓
SEED	✓
ORGANIC FERTILISER	✓
INORGANIC FERTILISER	✓
LIME	✓
GYPSUM	✓
COMPOST	✓
WILL IT WORK?	✓
